

Customer Checklist

8575 US Hwy 51 (Fairway Building) • PO Box 699 Minocqua, WI 54548 • 715-892-7777

Before Starting Sled

- Check Gas & Oil Visually By Removing Caps/Check Coolant Bottle (Do Not Remove Cap)
- Kill Switch On
- When Engine Is Cold/Especially First Start Of The Day/Have Choke Lever On/Warm Engine For One Minute/Turn Choke Off/Continue to Warm Sled For 5 Minutes Before Riding
- Always Have Choke Lever Off For Warm Engine Start
- Never Let Engine Idle For More Than 5 Minutes
- Always Shut Sled Off If Not In Attendance

Before Riding Sled When Cold

- Always Break The Track Free & Spin Track To Break Loose Any Ice
- Break Loose Skis
- Be Careful To Not "Burn The Belt"

Call Us Immediately If

- Sled Does Not Start
- Sled Is Not Moving Forward Smoothly
- Brakes Or Thumb Throttle Not Working Properly
- 715-892-7777
- Please Leave Keys In Sled With Discretion

When Putting Fuel In The Sleds

- Be Sure To Use Premium No Ethanol Fuel Only
- Protect The Filler Neck
- Pick A Sled In The Group To Use As The "Trip Odometer"
- Always Refuel Around 70 Miles/Most Sleds Will Get 100 Miles Per 10 Gallon Tank
- Do Not Trust Your Gas Gauge

Finally

- Have Fun & Ride Safely At All Times
